Thank you for your recent purchase of a Grouser Ag Pro 3-5 Dozer. Welcome to the family of satisfied Grouser blade owners. Grouser Products is committed to offering quality products to help professionals in their daily jobs. We are also committed to providing you the highest level of customer satisfaction possible. Again, thank you for your patronage. We look forward to serving you.

This manual contains information concerning the operation, adjustment, safety and maintenance of the Ag Pro 3-5 Dozer. You have purchased a dependable, long lasting piece of equipment. You can expect to receive long lasting performance and long service built into our products with proper care and operation. Please have all operators read and understand this manual carefully. Keep the manual available for reference. If, for any reason, you have questions or comments, we would be happy to hear from you. Call our toll-free number, 701-282-7710, or send us an e-mail at info@grouser.com. You can expect us to respond to your e-mail in a timely manner.

HANT	Hydraulic Angle - No Tilt					
NAHT	No Angle - Hydraulic Tilt					
NANT	No Angle - No Tilt					

ontents

A careful operator is the best operator. Most accidents can be avoided by observing certain precautions. To help prevent accidents, read and take the following precautions before operating this equipment. In addition, please follow all safety and operational instructions of your tractor manufacturer.

# The Ag Pro 3-5 Dozer:

- 1. The Ag Pro 3-5 Dozer should be operated only by those who are responsible and instructed to do so.
- 2. Read the owner's manual carefully before using this equipment. Lack of operating knowledge can lead to accidents.
- 3. Keep the Ag Pro 3-5 Dozer maintained in reliable and satisfactory condition to ensure your safety.
- 4. Make sure the area is clear of people before moving any equipment.

5. Do not modify or permit anyone else to modify or alter the equipment and its components without first consulting Grouser Products.

6. Lower the blade to the ground when not in use.

# Servicing the Ag Pro 3-5 Dozer:

- 1. Read and follow all safety instructions provided by the tractor manufacturer.
- 2. Always use proper personal safety gear when performing maintenance on equipment.
- 3. Before servicing, relieve hydraulic pressure, stop engine and fully engage parking brake.

4. Escaping hydraulic fluid under pressure can penetrate skin causing serious injury. If fluid is injected into skin, obtain medical attention immediately.

- DO NOT use your hand to check for leaks. Use a piece of cardboard or paper to search for leaks.
- Stop the engine and relieve pressure before connecting or disconnecting lines.
- Tighten all connections before starting the engine or pressurizing lines.

# Storing the Ag Pro 3-5:

- 1. Thoroughly clean the Ag Pro 3-5 Dozer before storage. Use paint where necessary to prevent rust.
- 2. Check the Ag Pro 3-5 Dozer for worn or damaged parts. Install new parts as required.
- 3. Lubricate all pins and joints.

Tighten all bolts to the values listed below unless otherwise noted. Refer to the parts lists for proper length and grade of the bolts.

	Torque - Dry (ft–lbs)					
	SAE G	rade 5	SAE G	irade 8

M20 x 2.50	401
M22 x 2.50	547
M24 x 3.00	694

Unstrap and remove the lift frame, hoses, top arms, and any boxes of hardware from the undercarriage. If any components are missing, call Grouser.

Install undercarriage per the tractor specific mounting instructions.

Some assembly of Lift System components is necessary. Follow the steps listed below. See diagram below for the correct hardware and orientation of parts.

- 1. Remove all pins and fasteners on each side of the undercarriage and set aside for later installation.
- 2. Position the lift frame between the two plates on both sides of the undercarriage and align to the bottom holes.
- 3. Insert pins and hardware to attach the lift frame, the base end of the lift cylinders, and the top arms to the undercarriage.
- 4. Insert pins and hardware to attach the male quick attaches to the lift frame, and to the top arms. Use 2" washers as shims to
- keep top arm pins tight and in place. Only use as many as needed until pin is tight.
- 5. Torque all fasteners according to the specifications on Page 3.

Hose Not Drawn to Scale

Item A for CNH, JD 9R, JD 9030

Item B for Versatile, Challenger MT900 and JD 9RX

Note: Refer to Pages 6-8 for the correct hose lengths and hose location.

Note: All connections are identified by spiral bands. 2 bands are from the base end of a cylinder and 1 band is from the rod end of a cylinder. Orange = Lift, Green = Tilt, Red = Angle, Blue = Left Blade Cylidner, and Brown = Right Blade Cylinder.

- 1. Connect the lift hoses to the lift cylinders.
- 2. Verify that hoses are not twisted and protected from rubbing on any sharp edges. See Pages 6-8 for proper hose routing.
- 3. Attach the multi-coupler to the top arm mount and install the 45° fittings.

4. Identify each remaining hose at the front of the undercarriage by the colored bands on end of hose and connect hose to corresponding 45° fitting on multi-coupler. Refer to Pages 6-8 for proper hose locations.

5. Hoses were plugged into the rear of the tractor during the undercarriage installation.

6. Continue on Page 10 for initial startup instructions.

Prior to operating the blade system, all air must be purged from the hydraulic system. Follow the steps below for each function on your blade.

### Prior to operating your blade. Lift Function: 1. With the lift france 2. Actuate the rais 3. When oil starts 4. Continue to flow 5. Actuate the function

- 1. With the lift frame down and blocked, loosen the fittings on both ends of the lift cylinders.
- 2. Actuate the raise function to supply oil to the rod end of the cylinders.
- 3. When oil starts to flow from the fittings, stop oil flow, and tighten the fitting on the rod end of the lift cylinders.
- 4. Continue to flow oil until the system is fully raised and then block the lift frame.
- 5. Actuate the function in the opposite direction to supply oil to the base end of the lift cylinders.
- 6. When all air is removed from the lift system, stop oil flow and tighten the fittings on the base end of the lift cylinders.
- 7. Raise lift system and remove blocks. Cycle up and down 5 more times.
- 8. Check tractor oil level and fill if necessary.
- 9. Continue with connecting the blade on Page 11.

# Tilt Function:

1. Use a lift or jack to tilt the blade system until the left side is fully up, loosen the fittings on the rod and base end of both tilt cylinders.

2. Actuate the tilt function to extend the right tilt cylinder and supply oil to the base end of the right cylinder and to the rod end of the left cylinder.

3. When oil starts to flow from the fittings, stop oil flow, and tighten the fitting on the base end of the right cylinder and rod end of the left cylinder.

- 4. Remove the lift or jack.
- 5. Continue to actuate the tilt function until oil flows out of the remaining open ports.
- 6. Actuate the tilt function in the opposite direction.
- 7. When all air is removed from the tilt system, stop oil flow, and tighten the remaining fittings on the cylinders.
- 8. Cycle both cylinders in and out 5 more times.
- 9. Check tractor oil level and fill if necessary.

# Angle Function:

- 1. Loosen the fittings on the rod and base end of the left angle cylinder.
- 2. Actuate the angle function to extend the left angle cylinder and supply oil to the base end of the left cylinder.
- 3. When oil starts to flow from the fittings, stop oil flow, and tighten the fitting on the base end of the left cylinder.
- 4. Continue to actuate the left angle function in the same direction until the cylinder is fully extended.
- 5. Actuate the left angle function in the opposite direction.
- 6. When oil starts to flow from the rod end fitting, stop oil flow, and tighten the rod end fitting on the left angle cylinder.
- 7. Continue to actuate the left angle fuction until cylinder is fully retracted.
- 8. Loosen the fittings on the rod and base end of the right angle cylinder.
- 9. Actuate the angle function to extend the right angle cylinder and supply oil to the base end of the right cylinder.
- 10. When oil starts to flow from the fittings, stop oil flow, and tighten the fitting on the base end of the right cylinder.
- 11. Continue to actuate the right angle function in the same direction until the cylinder is fully extended.
- 12. Actuate the right angle function in the opposite direction.
- 13. When oil starts to flow from the rod end fitting, stop oil flow, and tighten the rod end fitting on the right angle cylinder.
- 14. Continue to actuate the right angle function until cylinder is fully retracted.
- 16. Cycle the left cylinder in and out 5 more times and then the right cylinder in and out 5 more times.
- 16. Check tractor oil level and fill if necessary.

# Blade Width Function:

- 1. Loosen the fittings on the rod and base end of the right cylinder.
- 2. Actuate the blade width function to extend the right cylinder and supply oil to the base end of the right cylinder.
- 3. When oil starts to flow from the fittings, stop oil flow, and tighten the fitting on the base end of the right cylinder.
- 4. Fully extend the right cylinder.
- 5. Actuate the function in the opposite direction.
- 6. When oil starts to flow from the rod end fitting, stop oil flow, and tighten the remaining fittings on the cylinders.
- 7. Continue to actuate the cylinder until cylinder is fully retracted.
- 8. Cycle the right cylinder in and out 5 more times.
- 9. Repeat Steps 1-8 for the left cylinder
- 10. Check tractor oil level and fill if necessary.

Run the blade through all the functions. If any function does not operate correctly, refer to corresponding section above and rebleed. If problem still persists, call Grouser Products.

## To Connect:

### Note: If necessary, use a spotter to help center the blade on the lift system.

1. If necessary, lift the locking latch and push the quick attach lock handle on the left side of the lift system to open the quick attach system. Refer to Page #16-17 for further clarification on the quick attach system.

2. Drive the tractor forward slowly until the top edge of the male quick attach is under the top hook of the female quick attach on the blade assembly.

3. Raise the lift system until the male quick attach engages the female hook. If both sides don't fully engage, reposition. Continue to raise the lift system until the blade is off the ground and the female quick attaches are against the front of the male quick attaches.

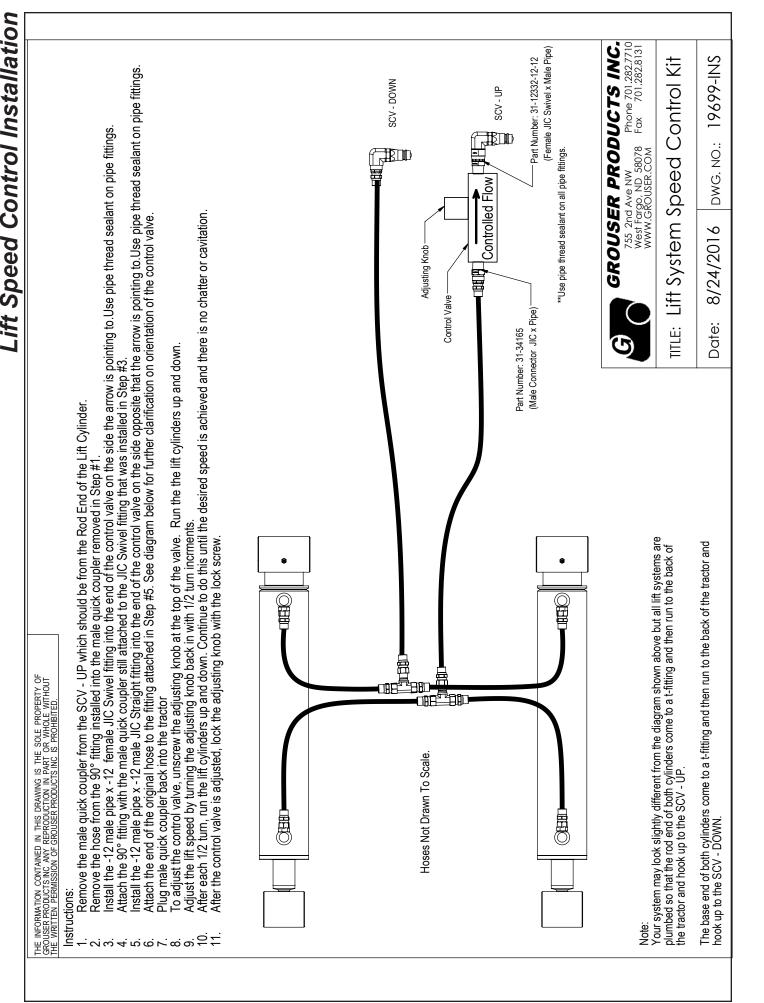

- 4. Shut off the tractor engine and set the parking brake.
- 5. Pull the quick attach lock handle to engage the quick attach pins and lift the locking latch to lock the handle in place.
- 6. Clean and connect hydraulic multi-coupler on the top arm. Refer to Pages 30-31 for cleaning and connecting information.
- 7. If initial startup, refer to Page 10 before operating any function of the blade.

# To Disconnect:

- 1. Lower the blade until the cutting edge is off the ground a few inches.
- 2. Shut off the tractor engine and set the parking brake.
- 3. Unhook the multi-coupler on the top arm.

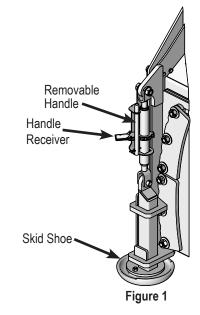

4. Remove the multi-coupler covers from the parking stations on the blade assembly and install on the multi-couplers on the top arms.

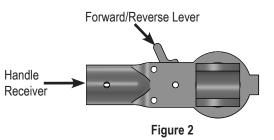

- 5. Plug the blade side multi-couplers into the parking station.
- 6. Lift the locking latch and push the quick attach lock handle to disengage the quick attach pins.
- 7. Start tractor, disengage the parking brake, and lower the blade until cutting edge is on the ground.
- 8. Continue to slowly lower the lift system to disengage the blade.
- 9. Slowly back away from the blade. When lift system is clear from the blade, raise the lift system.
- 10. Shut off the tractor engine and set the parking brake.

### Skid Shoe Adjustment:

- 1. Remove the handle from the ratchet keeper by pulling the hitch clip pin and insert it into the handle receiver on the ratchet jack.
- 2. Loosen the locking nut on the ratchet jack.
- 3. Hold the body of the ratchet jack and rotate the ratchet jack handle to raise or lower the skid shoes.
- 4. If the skid shoe is not moving in the proper direction, flip the forward/ reverse lever on the handle (see Figure 2). Rotate the ratchet jack handle again to move the skid shoe in the desired direction.
- 5. After the skid shoe is adjusted, rotate the ratchet jack handle until it rests against the ratchet keeper. Return the removable handle to the ratchet keeper ensuring that the ratchet jack handle is captured by the removable handle and the ratchet keeper. Secure the handle to the ratchet keeper with the hitch clip pin.
- 6. Tighten the locking nut against the ratchet jack body to keep it from moving.
- 7. When skid shoes are worn up to the bolt heads, replace skid shoes.

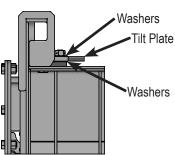

### **Preferred Method:**

- 1. The preferred blade position for adjusting the tilt plates is laying face down on blocks.
- 2. Remove the 6 nuts from the right tilt plates.
- 3. Remove skid mount to obtain better access to the bottom nuts.
- 4. Add or remove washers as needed to adjust tilt-way clearance to 1/16" 1/8".
- 5. Reinstall the nuts in the right tilt plates.
- 6. Follow Steps #2-5 for the left tilt plates.
- 7. Once the tilt-way clearance is set, torque bolts to 640 ft-lbs.

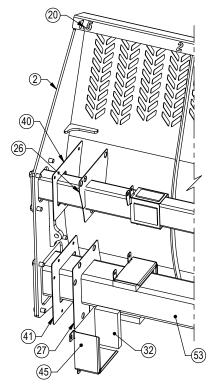

### Non-Preferred Method:

# Note: Do not remove all of the bolts at the same time if the blade is not laying face down.

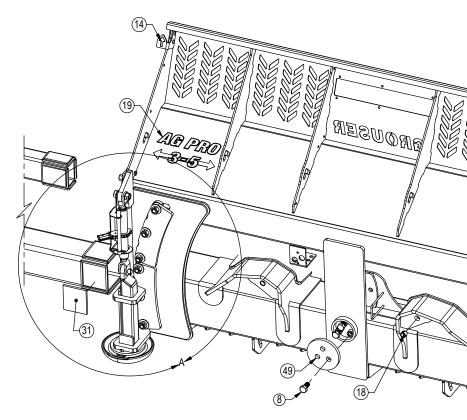

- 1. The non-preferred blade position for adjusting the tilt plates is the blade in the upright position.
- 2. Remove the skid shoe mounts to obtain better access to bottom tilt plate nuts.
- 3. Remove the 3 nuts from the top right tilt plate and the bottom left tilt plate..
- 4. Add or remove washers as needed to adjust tilt-way clearance to 1/16" 1/8".
- 5. Reinstall the nuts in the top right tilt plate and the bottom left tilt plate.
- 6. Follow Steps #2-5 for the bottom right tilt plate and the top left tilt plate.
- 7. Once the tilt-way clearance is set, torque bolts to 640 ft-lbs.

### Before Each Use:

1. 2.

3. 4.

5.

Multi-Coupler Maintenance

raulic

- Disconnect the mobile half from the parking station and the cap from the fixed half.
  - Check that there is no contamination (salt, sand, dirt, etc.):
    - A. On the pins.
    - Β. Inside the cam.
    - C. In the locking mechanism area.
    - D. On the face of the plates and couplings.
  - In case of contamination, remove it with a cloth and/or compressed air.
- Check that there is still a lubricant/anti-corrosion (grease or silicone see Note 1):
  - A. On the pins.
  - Β. Inside the cam.
  - C. In the locking mechanism area.
  - Connect the mobile and fixed halves together.

### After Each Use:

- Disconnect the mobile half from the fixed half. 1.
- 2. Clean all contamination (salt, sand, dirt, etc.) from the following areas:
  - A. On the pins.
  - Β. Inside the cam.
  - C. In the locking mechanism area.
  - D. On the face of the plates and couplings.
  - \*Use a cloth or compressed air. It is advised to not use water to clean these surfaces
  - Apply a lubricant/anti-corrosion (grease or silicone see Note 1):
    - Α. On the pins.
    - Β. Inside the cam.
    - C. In the locking mechanism area.
  - Connect the cap to the fixed half and the mobile half to the parking station.

### Note 1:

4.

3.

When sand and salt are present, or the plates under go a washdown, a heavy duty silicone spray lubricant should be used to replace grease from the factory. The lubricant should help protect from corrosion without collecting dust and contaminants, and will resist washing off when exposed to water.

Mobile Half

A

**Fixed Half** 

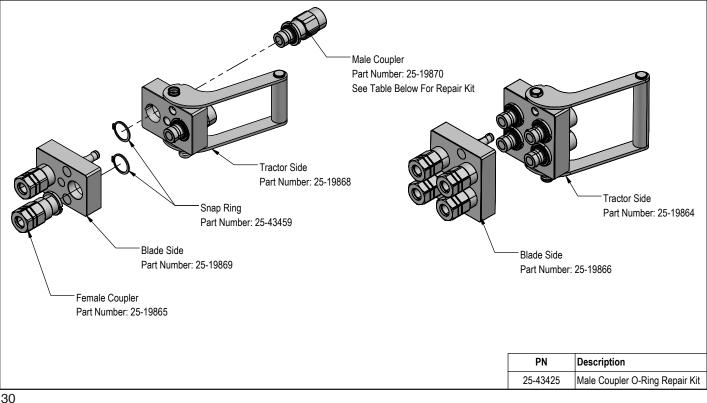

Ć

(D

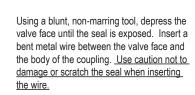

B

### Recommended Lubricant Brands:

Fluid Film (Aerosol or Non-Aerosol), LPS-2 Heavy Duty Lubricant, or CRC 3-36.

Make sure the coupling is securely fastened

into the plate or place in a vice.

Inspect the seal and interior surfaces for contamination.

3.

4.

5.

- In case of contamination, carefully wipe surfaces with a soft cloth, or use compressed air to blow the contamination out. Do Not press hard on the seal as contamination can scratch the seal surface.
- Using a non-marring tool, depress the valve face and remove the metal wire. Release the valve to the flush position.

### **Cleaning The Female Bushing:**

1.

2.

3.

4.

5.

- Make sure the coupling is securely fastened into the plate or place in a vice.
- Using a non-marring tool, depress the outer ring to expose the bushing. There is no need to expose the valve seal, so stop pressing before the valve is opened.
- Inspect the interior body and bushing surfaces for contamination.

- In case of contamination, carefully wipe surfaces with a soft cloth, or use compressed air to blow the contamination out.
- Release the outer ring so that it returns to the flush position.

# Improvements

Grouser Products Inc. is continually striving to improve its products. We reserve the right to change prices, specification, or equipment at any time without notice. We also reserve the right to make improvements or changes when it becomes practical and possible to do so without incurring any obligation to make changes or additions to the equipment sold previously.

# Warranty

Grouser Products warrants to the original purchaser of each item that the product be free from defects in material and workmanship under normal use and service for a period of two (2) years for Agriculture Series Blades and one (1) year for Heavy Duty Series from date of original retail delivery.

## The obligation of the consumer under this warranty:

- 1. To read the operators manual and to operate, lubricate, maintain and store equipment in accordance with the instructions listed in the operators manual.
- 2. To inspect equipment and if any part needs repair or replacement when continued use would cause damage or wear to other parts or safety.
- 3. All equipment or parts claimed to be defective in material or workmanship must be made available for inspection at the place of business of a dealer authorized to handle the equipment covered by this warranty, or, upon request by Grouser Products, shipped to the Grouser Products factory in West Fargo, North Dakota.

## The obligation of the dealer under this warranty:

- 1. Complete warranty registration form and submit within 30 days of sale.
- 2. Contact Grouser Products for authorization prior to performing any warranty repairs or part replacement.
- 3. Complete warranty request form and submit with photos and supporting documentation.

## The obligation of Grouser Products under this warranty:

- 1. Repair or replace, any equipment or parts, in the judgment of Grouser Products to be defective in material or workmanship.
- 2. Grouser Products will cover the cost of parts and ground shipping at dealer invoice only.
- 3. Grouser Products shall have no obligation to bear the cost of labor or transportation in connection with replacement or repair of any such defective parts.

## This warranty does not cover:

- 1. Depreciation or damage caused by normal wear, accident, improper assembly, improper adjustments.
- 2. Improper maintenance including lack of proper lubrication, or improper use. Including loose bolts, nuts, or fitting due to over tightening or vibration after 20 hours of operation.
- 3. Repairs or alterations without authorization from a Grouser Products representative.
- 4. Grouser Products shall have no liability if the equipment has been altered or reworked without the written authorization of Grouser Products.

Grouser Products' parts, which are furnished under this warranty and properly installed, shall be warranted to the same extent as the original parts under this warranty if, and only if, such parts are found to be defective within the original warranty period covering the original equipment.

## NO EMPLOYEE OR REPRESENTATIVE OF GROUSER PRODUCTS IS AUTHORIZED TO CHANGE THE WARRANTY IN ANY WAY OR GRANT ANY OTHER WARRANTY.

# Contact Us

As always, if you have any questions about your system or other products made by Grouser, feel free to contact us.
